Informational Pages

Create a page that has text & graphics, videos or links. Use the classic editor or choose the block style editor to create the page. The block style editor has page templates to give you a more custom look. Click the <> in the editor to see the HTML code.

Post Directories

Create a directory page by selecting post types that will automatically be added to the directory when they are added to the catalog. Directories display posts in a list format.

Page Links

Add a hyperlink page for viewers to click the page name in the navigation bar and be linked to another location inside or outside of the portal.

Catalog Directories

Create a directory page by selecting catalogs that will automatically be added to the directory when added. Directories display catalogs in list format.
